## A Reviewer's Form

(Monograph and Textbook)

Author:	Kludia Bednárová-Gibová
Title:	Selected Chapters in English Lexicology
<b>Publication Parts:</b>	
Title:	Is the publication title suitable in terms of contents and aims? a) Yes + b) no (the title is too general or concrete, it does not comply with the contents of the work) Suggestion for a new title:
Aims of the publication:	a) set clearly and precisely + b) set vaguely c) not set at all
Contribution:	a) made clearly and precisely + b) made vaguely c) not made at all
<b>Contents of the publication:</b>	
Context:	a) the author knows the problem area very well + b) the author knows the problem area partly and eclectically c) the author does not show a firm grasp of the problem area
Methodology	a) clear and pronounced, applied consistently with the aims + b) vague, cumbersome and inappropriate for achieving the results
Aims:	a) the aims have been successfully accomplished by the author + b) the aims have been partly accomplished by the author c) the aims have not been accomplished by the author
A new scientific dimension:	a) present (the author creates a new quality of knowledge in the context of the problem area) b) partly present + c) absent

<b>Formal aspect of the publication:</b>	
Language and stylistics	a) appropriate + b) the text needs a minor revision c) the text needs a major revision
Technical level:	a) appropriate + b) the text needs a minor revision c) the text needs a major revision
Scope:	Is the scope of the work relevant for its significance? a) yes + b) no
<b>Other reviewer's comments:</b> <p>Selected Chapters in English Lexicology is an inside look at what goes on in modern world of lexicology. The book answers the question of how traditional and fundamental issues in lexicology get along with modern achievements in lexicography and other trends in linguistics. The science about language is developing so fast – becoming more specialised, creating new disciplines and sub-disciplines. But it is still vitally important to provide a fundamental review of existing trends for language students, who are, obviously, the target audience of Klaudia Bednárová-Gibová's book.</p> <p>This manuscript does an excellent job opening new horizons in lexicology and lexicography, and merging them with the theoretical postulates of classical lexicology, which is, definitely, the best way to present specific scientific information for the university students of the 21st century. In her introduction, the author mentions that the book systematically describes the strands of the English lexicon, and is intended to help undergraduates become more proficient in the use and grasp of English words. The structure of the textbook is organized into seven main chapters, combining both traditional topics as well as more recent scientific theories of lexical semantics and lexicography. Having received the manuscript for revision, we used some of the chapters in teaching applied linguistics at Lesya Ukrainka National Eastern European University (Lutsk, Ukraine), and we have been fully satisfied with the results.</p>	
<b>Final recommendation:</b>	a) I recommend the work be published + b) I recommend the work be published after incorporating my comments and removing shortcomings c) I do not recommend the work be published
