COURSE DESCRIPTION

University: <i>University of Prešov</i>	
Faculty: <i>Faculty of Arts</i>	
Course code: <i>2PGD/ZVSPD/22</i>	Course title: <i>Introduction to higher education pedagogy</i>
Type, scope, and method of educational activities: <i>Type of teaching: Lecture, Seminar</i> <i>Scope of teaching activities: 13 /13 hours per semester (block teaching)</i> <i>Method: combined (face-to-face, Moodle, MS Teams)</i>	
Number of credits: <i>5</i>	
Recommended semester/trimester of study: <i>1st</i>	
Degree of study: <i>3.</i>	
Prerequisite subjects: <i>-</i>	
Conditions for passing: <i>Exam</i> <i>Continuous assessment: during the semester students will be given assignments to work on and these will be part of the interim assessment: presentation of the topic (30%), discussion (20%), project (20%).</i> <i>Final assessment: colloquial exam (30%)</i> <i>Credits will be awarded on the basis that all of the above requirements have been met. The grade evaluation is carried out according to the grading scale A, B, C, D, E, FX according to the Study Regulations of PU v Prešov.</i>	
Learning outcomes: <i>Students will gain a basic theoretical perspective in pedagogical, social and psychological as well as legislative issues of university education. This basis, i.e. understanding of basic pedagogical and psychological knowledge, will form the starting point for beginning teachers so that they can develop their didactic skills and their adequate application in the teaching of subjects of their specialization. Independent work, training and subsequent verification of their quality will develop students' pedagogical, socio-psychological, communication, self-assessment and managerial-management competencies for teaching at the university at the most general level.</i> <i>Graduates of the course will be able to:</i> <ul style="list-style-type: none"> <i>- describe the system of higher education pedagogy and compare models of teacher training in an international context and understand social function of universities,</i> <i>- characterize the system of university didactics, justify the need for didactics for teaching practice at universities and analyze the basic problems of university didactics.</i> <i>- define the forms and methods of teaching at universities, analyze their specifics and evaluate the importance of their use in terms of educational goals.</i> <i>- define basic concepts related to the category of educational objectives (educational goal, competencies, goal taxonomy, consistency, goal measurability, etc.), evaluate the importance of the formulation of objectives, especially with regard to their diagnostic function; on the</i> 	

basis of didactic analysis, to design a set of educational goals for a specific subject, to apply the principles of formulating a specific educational goal while setting a goal for a specific educational unit.

- characterize the didactic cycle, critically evaluate the importance of individual phases of the didactic cycle, justify the process of preparation for a lesson, design a project of their own teaching unit on a selected topic, analyze and evaluate the importance of control and evaluation of the teaching process.

- design, implement and, on the basis of reflection and self-reflection, critically evaluate the positives and negatives of their own teaching activities (self-assessment within the output - implementation of a seminar at the university in relation to designing a teaching unit, its implementation from a didactic point of view but also communication and rhetoric) and of the teaching activities of other students.

- analyze psychological conditions of university education, know the cognitive and personality specifics of the age of adolescence and early adulthood, and psychologically justified specific teaching process at the university with emphasis on the activity of a student.

- propose complex solutions to the indicated pedagogical-psychological problems and to initiate their discussion within the group.

- analyze and evaluate the legislative conditions of higher education and propose comprehensive solutions to the indicated problems.

- assess the personality as well as wider societal impact of the results of education based on innovative methods and forms of education.

- acknowledge the existence of university teachers as a specific social group, their ethical standards, educational objectives. To argue for and be able to defend their positions in front of other members of the academic setting.

Brief outline of the course/Course content

1. Introduction to university pedagogy.

The subject-matter and objectives of university pedagogy, strategies of higher education at international and national levels, models of teacher training (distance method).

2. Didactics of university pedagogy.

Professional standard of a university teacher and his/her competences, ethics of a university teacher. Forms and methods of teaching at the university: lectures, seminars, exercises, testing and evaluation, practice, presentations, demonstrations. Independent work of students, activating methods in higher education, distance e-learning education, group and cooperative teaching, project methods. University management - the university as an institution.

3. Psychological issues of university education.

The basics of psychology of learning and teaching at universities. Psychological characteristics of adolescence, transition from secondary school to university, socialization, adaptation, learning styles. The personality of a university teacher - educational and teaching styles, the creativity of a university teacher, ethics in the work of a university teacher. Psychological principles of pedagogical and social communication. Spoken word culture. Rhetoric. Solving difficult life situations, the basics of psychological hygiene.

4. Research activities at universities with an orientation on pedagogical issues. Research methods in pedagogical quantitative and qualitative design.

5. The fundamentals of university legislation, copyright law, guidelines and standards for university education, grants, project design (distance method).

6. Training pedagogical skills (with a focus on didactically proper design of lectures, seminars / exercises, pedagogical communication, rhetoric and spoken word culture), reflection and self-reflection in seminar meetings.

COURSE DESCRIPTION

University: <i>University of Presov</i>	
Faculty/university workplace: <i>Faculty of Arts</i>	
Code: 9UJK/CUJAA/22	Course title: <i>English in academic discourse</i>
Type, scope and method of educational activity: <i>Type of educational activity: Seminar</i> <i>Scope of educational activity:</i> <i>Internal form: 0/2 h per week, 0/26 per semester or in form of block scheduling, method of seminars: presencial, distant form of study, seminars: elaboration and presentation of seminar papers, consultations with a lecturer</i> <i>Method of educational activity: combined</i>	
Number of credits: 5	
Recommended semester: <i>2nd, 4th, 6th semester - Summer semester</i>	
Study grade: 3.	
Prerequisites: -	
Conditions for passing the course: <i>Assessment and completion of the course: Exam</i> <i>Final assessment:</i> <i>The final assessment is a set of written materials (portfolio and grammar test) and presentation of the project work, regular attendance, and active participation in the course.</i> <i>The portfolio consists of:</i> <i>The written form of the project of his/her own dissertation thesis.</i> <i>Curriculum Vitae (Europass).</i> <i>Resumé (about 3 – 5 pages) from the relevant research literature (30 – 50 pages).</i> <i>Presenting the project of own dissertation thesis.</i> <i>All assessment elements are compulsory (in case of absence, some additional assignments are given).</i> <i>The percentage requirements to achieve credits are as follows:</i> <i>To obtain assessment A (excellent) the student must gain at least 90%, to obtain assessment B 80%, to obtain assessment C at least 70%, to obtain assessment D 60%, to obtain assessment E at least 50%. The student who gains 49% and less, fails (FX). An overall assessment of the student is based on the oral presentation on a chosen topic, essays submitted during the semester, and on the calculation of the percentage obtained in the test.</i> <i>In the case of the distant form of study, if written tests are replaced by home assignments, the student can take the exam only if he/she meets at least 50% of the home assignments.</i>	

At the exam, the student undergoes a final test. The student will be successful in the exam if he/she obtains at least 50% of the required points in the final test.

The final grade is determined by the sum of points obtained in the written test (in the case of the distant form of study – home assignments), seminar work, and in the oral exam, as follows: A (100-90), B (89-80), C (79-70), D (69-60), E (59-50), FX (49-0).

Credits will not be awarded to a student who does not actively participate in seminars.

Teaching methods: the course requires the use of mass teaching methods, group teaching, verbal methods (monological, dialogical, work with literature), individual work (home assignments), if necessary, e-learning is also used (e.g. Moodle or MS Teams and others).

Learning outcomes:

- *After getting acquainted with basic information in the field of knowledge, skills, and competencies, the graduate of the course:*
- *has universal communication language competences and on this basis is able to present his/her own work and the research results as well as demonstrate knowledge of relevant literature;*
- *has sociolinguistic competence B2/C1 level (according to Common European Framework of Reference for Languages) in presenting himself/herself not only in everyday situations but also in presenting results of his/her own dissertation thesis;*
- *has pragmatic competence to perform meaningful interactions in various situations focused on his/her own professional work;*
- *is able to respond appropriately to inter/multicultural linguistic stimuli;*
- *critically analyses, creates, and formulates new hypotheses, judgments, and strategies for the further development of the scientific field;*
- *evaluates theories and various concepts as well as presents his/her thesis according to the criteria of speech communication using the latest technology;*
- *is able to create, implement and modify a substantial part of his/her research with scientific integrity and to determine the scientific or practical assumptions for problem-solving;*
- *has level B2/C1 in spoken and written form, in all language skills (listening, speaking, reading, and writing);*
- *in the field of practical skills, the graduate is able to apply his/her own findings resulting from the theoretical analysis and his/her own scientific research of a complex and interdisciplinary nature, as well as to propose new research methods in a foreign language;*
- *has critical thinking, and critical analysis as well as is able to select important and relevant information;*
- *at the application level, the graduate can apply the acquired knowledge and findings in English at various levels. He/she is able to present the results of his/her own research and is able to communicate his/her field of expertise to the wider scientific and lay public (e.g. at conferences, etc.) in English;*
- *has skills and methods of scientific research associated with his/her field of study corresponding to the current state of his/her knowledge in domestic and foreign cultural environments;*
- *has information about the criteria for effective presentations and constructive criticism of linguistic expressions according to the latest communication theories;*
- *through the acquired knowledge and competencies, the graduate is able to approach his/her own development independently, responsibly, and in an innovative way as well as is responsible for the development of society in the context of scientific and technical progress*

regarding ethical principles;
- is independent and autonomous in acquiring new linguistic issues with the possibility of expanding pedagogical knowledge and its use in other subjects and further study.

Course content:

The course focuses mainly on academic writing skills in English, writing techniques, organization of writing (criteria and requirements for writing abstracts, resumés, conference papers, dissertation theses, etc.).

- Curriculum Vitae requirements: CV (Europass).
- Speaking techniques (organization and structure, use and information supported by relevant sources, academic ethics, effective transition between parts of speech).
- Reading comprehension and translation of relevant scientific texts.
- Vocabulary development with the focus on his/her own research area.
- Oral and written presentation of his/her own research work.
- Professional conversations on various topics (workplace, workload, study/study stay, etc.).
- Presentation of studied scientific literature, information about the dissertation thesis (topic, objectives, and methods of work, research findings, benefits, and professional cooperation).

Study grade: <i>3.</i>	
Prerequisites:	
Conditions for passing the course: <i>The evaluation consists of two parts:</i> <i>1) Theory - written test focused on knowledge and understanding of general principles of structural modeling (50%)</i> <i>2) Application - correct processing of a specific assignment of empirical data (50%)</i> <i>Credits will be awarded on the basis of meeting both of the above requirements according to the classification scale A, B, C, D, E, FX - Study Regulations PU in Prešov.</i> <i>The course will be completed by continuous assessment.</i> <i>Continuous assessment</i>	
Learning outcomes: <i>Knowledge:</i> <i>1. Understanding the basics of modern psychometric theory: the theory of latent variables</i> <i>2. Knowledge of rules and assumptions of latent models formulation</i> <i>3. Knowledge of the principles and technical means of SEM analysis</i> <i>4. Presentation of the results of SEM analysis</i> <i>Skills:</i> <i>1. Analysis of a complex theory expressed in the form of confirmatory factor analysis models as well as the most common types of structural regression models.</i> <i>2. Ability to assess the consistency of the model and data and interpretation of the results of the model estimation.</i> <i>3. Acquisition of basics for the study of more advanced SEM applications such as Latent Growth Curve Analysis, Multilevel SEM, Latent Change Analysis, Bayesian SEM.</i> <i>Competences:</i> <i>1. Application of SEM principles into own research</i>	
Course content:	

Structural equation modeling (SEM) is a set of techniques in which it is possible to define, test and interpret complex relationships of latent and observed variables, while explicitly modeling the measurement error and taking into account the probabilistic nature of data in the social sciences.

1. Theory of latent variables - semantics and syntax. Right score vs. latent variables. Dimensionality of the observed score. Section diagram. Purposes of using SEM. Introduction of SPSS AMOS software. Section analysis. Assumptions of SEM analysis. SEM steps. Data screening for SEM analysis. SEM model parameters. The concept of degrees of freedom.

2. Specification of measurement models and structural model. Rules for identification of latent models. Solving model identification problems. Structural model estimation methods. Bootstrapping. Model estimation output elements. Model test (χ^2). Close match indices. Confirmatory factor analysis model.

3. Structural regression model. Signs of the presence of an incorrect model specification. Procedures of complex model diagnostics. Model specification. Model comparison. Explanatory economy.
