	Recommended number of hours:		
	Per week: - Total per study: 5days/40hours		
Prerequisites:			
Assessment: credit			
Course assessment:			
Final assessment: graded credit			
Objective: To verify the theoretical knowledge of students in practice and to learn, directly in terrain, about physical-geographical and human-geographical traits of certain types of landscape and regions of Slovakia.			
Course content: During the excursion students will acquaint themselves with physical-geographical and human-geographical features of Slovakia and with their spatial distribution. Student will visit some typical settlement structures, areas with atypical ethnical structure, an industrial factory, agricultural company, all with respective commentary. Students will elaborate final report.
