

## Course Description

<b>University:</b> <i>University of Presov</i>	
<b>Faculty/university workplace:</b> <i>Faculty of Health Care</i>	
<b>Code:</b> <i>6KDH/DEHA5-ER/25</i>	<b>Course title:</b> <i>Dental Hygiene 5</i>
<b>Type, scope and method of educational activity:</b> Type of educational activity: <i>Practical seminar</i> Scope of educational activity: <i>52 per semester</i> Method of educational activity: <i>Attendance</i>	
<b>Number of credits:</b> <i>3</i>	
<b>Recommended semester:</b> <i>3rd year WT</i>	
<b>Study grade:</b> <i>Bachelor</i>	
<b>Prerequisites:</b> <i>6KDH/DEHA4/22 - Dental Hygiene 4</i>	
<b>Conditions for passing the course:</b> <b>Form of assessment:</b> <i>The course is completed with an interim assessment. During the semester, the student will prepare and present a power point (PP) presentation based on scientific and professional domestic and foreign journals (20% of the course grade). During the examination period, the student takes a knowledge test and an oral examination (80 % of the course grade).</i> <i>The student must obtain at least 90.00% for an A grade, 89.99-80.00% for a B grade, 79.99-70.00% for a C grade, 69.99-60.00% for a D grade, and 59.99-50.00% for an E grade. A student scoring 49.99% or less will be graded with a grade of FX. The final grade will be calculated as the average of the activity grade over the semester, the knowledge test, and the oral response.</i> <b>Student Load :</b> <i>Class participation : 52 hours of student preparation - direct course load</i> <i>PowerPoint presentation - 5 hours of student preparation - indirect burden</i> <i>Independent study and preparation 33 hours - indirect burden</i>	
<b>Learning outcomes :</b> <i>Upon completion of the course, students will be able to:</i> <b>Knowledge:</b> <ul style="list-style-type: none"> <li>- describe the examination and treatment of all types of periodontal disease;</li> <li>- explain the examination and treatment of acute periodontal conditions, pulpoperiodontal complex;</li> <li>- characterize the examination and treatment of oral mucosa; distinguish between physiological and pathological conditions;</li> <li>- describe the examination and treatment of implants;</li> <li>- explain the use of different types of prognosis and in patient motivation;</li> <li>- identify errors and changes in the prevention and treatment plan, depending on cooperation and tissue response to treatment, in the context of recurrent oral hygiene deterioration;</li> <li>- identify errors and changes in relation to recurrent increased caries activity, erosion;</li> <li>- describe errors and changes in prevention and treatment plans in relation to recurrent increased periodontal calculus activity;</li> <li>- describe errors and changes in the prevention and treatment plan related to inadequate staff education, inadequate office equipment, low patient interest, inappropriate communication, patient harm.</li> </ul> <b>Skills:</b> <ul style="list-style-type: none"> <li>- implement identification of complete subgingival periodontal treatment with various types of ultrasound;</li> <li>- demonstrate the ability to differentiate between healthy and pathologically altered tissues in the implant area;</li> <li>- demonstrate subgingival airflow work according to patient type;</li> <li>- practically evaluate errors and changes in the prevention and treatment plan depending on</li> </ul>	

cooperation and tissue response to treatment, in the context of recurrent poor oral health;  
 - practically evaluate errors and changes in the prevention and treatment plan in relation to recurrent increased periodontal pouch activity;  
 - practically evaluate errors and changes in relation to repeated increased caries activity, erosion.

**Competencies:**

Use knowledge for professional and personal development especially in the form of:

- design and critical thinking skills in developing a plan for prevention and treatment of patient's hard dental tissue, periodontal disease (microbial and non-microbial tissue damage, treatment options, defect determination);
- elements of risk management in the design of mechanical, chemical and surgical treatment plans;
- demonstration of social competence in dealing with problems related to inadequate staff training, equipment in the outpatient clinic, poor patient care and inappropriate communication.

**Course content:**

Complete prevention and treatment plan for severe periodontal patients, infectious patients, hospitalized patients

Complete examination, documentation, cooperation

IOH: practice: IOH plan according to patient type

POH: practice: complete IOH and POH

Teeth whitening, periodontal surgery, prosthodontics in periodontology, implants, polishing, ultrasound, photography, diagnodent, laser, vector, air-flow, intraoral camera
