

We wish to inform you that on **12 November 2012** the University of Sassari has published the call for the "Erasmus Placement in Sardinia programme" for the second semester 2012/13.

The programme results from the agreement signed by the *University of Sassari*, the *Provincia di Sassari* (Provincial Authority), the *Comune di Sassari* (Municipality of Sassari) and the *Camera di Commercio, Industria Artigianato e Agricoltura di Sassari* (Chamber of Commerce - C.C.I.A.A.). Participation in the programme is restricted to university students enrolled at European institutions participating in the LLP who wish to carry out an internship in partner companies, institutions and agencies of North Sardinia.

Since the programme is meant as a SMP sub-programme support measure, we kindly ask you to forward this communication to any party involved in your mobility programmes (scholars, researchers, UG/PG/PhD students). We are also attaching the official logo of the programme in case your office or webmaster is interested in publishing a note on the bulletin-board or Facebook page of your University.

Students who wish to apply should send their curriculum vitae et studiorum (European format) to the following email addresses by **7 December 2012**: curgeghe@uniss.it/ relint@uniss.it. Please note that applicants must satisfy all requirements specified in the Placement offers and clearly state them in their CVs. Students who need to know the results of the selections before the deadline should specify it in the application. We shall forward all information to our partners so that local institutions and companies may match profile and internship. Upon placement availability, late applications may also be considered.

Please note that, as required in the LLP Erasmus calls, the selected students must have an accident, third-party and health **insurance** policy. Insurance-related costs may be fully covered by the home institution; failing this, the students must provide for it personally. Should the student placement activities be carried out in a laboratory, the insurance policy must also provide coverage for any accident connected with the use of chemical-biological substances.

Selected students will be enrolled in the University of Sassari and allowed to attend institutional courses and to take exams accordingly.

Italian language and Culture courses will also be offered by the University Language Centre **free of charge**.

Students will be granted free access to the library facilities and to wireless connection. They will benefit from several **facilitations** such as: canteen at reduced fee provided by the Regional Agency for the Right of Study (ERSU); discount on local public transport; special prices for accommodation granted by the Municipality and the landlords & lodgers associations to student enrolled in the University; free health service dedicated to incoming students; access to guidance and counselling service; discounts on music and theatre tickets and sports activities. A **first reception** service and a programme of **leisure activities** will be assured by the Erasmus Student Network (ESN) association.
