

Bachelor's Study Programme

ECOLOGY AND ENVIRONMENTAL STUDIES

Faculty of Humanities and Natural Sciences

University of Prešov

University of Prešov

Understand Nature. Protect the Future.

Discover the science of life and the environment through a dynamic, hands-on programme that blends fieldwork, lab analysis, and interdisciplinary research. This programme provides you with an opportunity to explore complex relationships between organisms and their environment—locally and globally.

You will gain practical skills in ecological sampling, species identification, data collection, and environmental assessment, while building a strong foundation in ecology, botany, zoology, geography, and natural resource protection.

From biodiversity monitoring to environmental impact assessments, this curriculum focuses on tackling ecological challenges of the 21st century. You will learn to work independently and in research teams, participate in scientific expeditions, manage ecological projects, and contribute to environmental policy and documentation.

Graduates are well-prepared for careers in public administration, environmental agencies, private consultancies, water management, and NGOs.

Type: Bachelor's, single-major, full-time

Duration: 3 years

Tuition fee: 2 000 EUR / per year

Requirements: Completed high school education,
English language
competence at B2 (CEFR level)
